- 1.How the c language can write identifiers to write variable names and constant names.
  - a. Variable name should be identifier.
  - b. No spaces in between

# Lbd Activity

1. Identify a valid variable name

- a. mad hu    b. var12    c. 12var    d. @5var

Answer :c.

Justification: The rule for declaring a variable is it should be an Identifier.

Identifier is a letter followed by combination of letters and numbers no spaces in between.

2. constants names are as same as the variable names.

- a. True.                      b. False.

Answer:a.

Justification: The rules for declaring constants and variable is same.
